Guidelines for
PAYMENT DOCUMENT AUDIT

Budgets and Accounting Department
Revised 06/03/13
INVOICE

Invoice
- Definition – demand for payment
- Original invoice
- Invoice vs. statement
- Invoice number – standards for unnumbered invoices
- Customer AR number
- Balance forward / past due amount
- Overpayment
- Credits

Vendor (screen 203)
- State agency – VID, TIN, ITV, RTI
- Petty cash custodian vs. employee
- Current W-9
- Ownership type in name
- Remittance address
- Federal taxpayer identification number

PROCUREMENT PROCESS

Authority
- Delegated purchasing limit; splitting purchases
- Exempt items
- Purchasing Department
- Emergency Response procedures
- Order placed before PO issued
- Contracts – approvals
- Memberships – approval form

Special Procurement Issues
- State agency service department
- Printing
- Professional services
- Consulting
- Contract Workforce

GOODS / SERVICES

Advance Payment
- Generally prohibited
- Leases, subscriptions, insurance premiums
- Progress payments must be in PO

Description
- Clear identification; notes added to clarify
- Part/catalog number not adequate
- Match to PO

Quantity and UOM
- Appropriate to items
- Match to PO
- Back-ordered, missing, or damaged items

Price and Extension
- Prices match PO or catalog
- Extended and totaled amounts correct
- “Not to Exceed” terms on PO
- Discount offers

Other Charges
- Texas sales tax and other taxes
- Shipping charges match PO
- Additional charges included on PO

ACCOUNT NUMBER

Appropriateness
- Items “fit” within program (SL)
- Items “fit” within funding source
- Transaction dates fall within program term dates
- Object code matches items
- Related object code groups
- Disallowed expenditure types

OTHER REVIEW ISSUES

- AY and State bank
- Legal Descriptive Text
- Useful description; important info first (line 1 on voucher or invoice)
- Dates – order, delivery, invoice, invoice received, discount, due, payment due, requested payment
PAYMENT DOCUMENT AUDIT
CHECKLIST

- Voucher / Invoice Transmittal signatures
- Business meals documented with 5 W’s
- Interest control flag and reason
- Appropriate form/version

TRAVEL EXPENSES (Employee, Direct-Bill Vendor, and Credit Card)

Record of Transportation and Duties
- Includes purpose, not just destination and route
- Dates match
- Personal vehicle mileage detail
- Direct billed and credit card items listed; travelers names included

Meals and Lodging
- In-state vs. out-of-state
- Each day listed
- Appropriate limits
- Travel Authorization form
- Director’s approval for “actual expenses”
- Shared lodging

Other Travel Issues
- State Travel Management Program rates
- Contract Travel Vendor Exception Form
- Airfare not charged to personal credit card
- Original receipts show payment
- Voucher description: first date, last date, primary destination
- Travel advance noted and applied against expenses

CREDIT CARD EXPENSE DISTRIBUTION VOUCHERS

Other Credit Card Issues
- Account number, statement date, cardholder name
- Vendor ID matches credit card type
- Missing Receipt forms
- Transaction Log
- Cardholder signature
- Voucher total matches statement
- Voucher description

PAYMENT DOCUMENT ERROR NOTIFICATION

- Email Preparer
- Attach Documentation to Payment Document

ACCOUNTS PAYABLE APPROVAL

- Special handling flag
- Additional coding for data entry
- Signature and date (first reviewer)
- Route for second review if needed
INTRODUCTION

"Texas A&M Forest Service provides statewide leadership to assure the state's trees, forests and related natural resources are protected and sustained for the benefit of all.”

State law requires the fiscal department of each agency to review and approve each payment voucher prior to issuing the payment. The purpose of the review is to assure that the documentation of the expenditure demonstrates that it is reasonable and appropriate to the agency and is properly recorded in the accounting records.

Voucher Certification

The voucher certification statement succinctly addresses these key elements of the review. The department head and support personnel are responsible for properly carrying out each aspect of the expenditure up to disbursement of the funds. Departmental personnel are responsible for signing the certification.

The voucher certification addresses the major elements of the procurement and expenditure cycle.

- Procurement process conforms to laws, policies, rules, and procedures.
- Invoice is true, correct, and unpaid.
- Goods/services have been received and conform to the purchase contract, agreement, or catalog.
- Expenditure is appropriate to the account to which it is charged.

Accounts Payable Review Resources

Accounts payable personnel must be familiar with and use a variety of resources in the review and approval process. Many of these resources are available on the internet.

- Guidelines for Disbursement of Funds and the TFS Appendix 4 includes general information about System and TFS rules for payment of vouchers.
- The eXpendit section of the State Comptroller’s website addresses many issues about expenditure of State funds.
- The Textravel section of the State Comptroller’s website addresses rules about documentation and payment of travel expenses.
- The State Travel Management Program administered by the Texas Procurement and Support Services section of the State Comptroller’s office provides contracts with travel-related vendors for lodging, rental cars, and airfares.
- Administrative Procedure 40.05 – Purchasing Procedures and Guidelines explains the appropriate processes and categories of TFS procurement transactions.
- The Emergency Response Manual [cited in Administrative Procedure 40.05, section 9] includes a section for emergency response purchasing procedures.
Payment Document Audit Checklist

There are several goals, as well as limitations, for this document. This document serves as a handbook for review and approval of vouchers, and its use should improve the consistency of the review process. The checklist provides a quick guide for voucher audit, supported by a narrative discussion of each review item. Although the checklist is addressed to the accounts payable personnel in the Budgets and Accounting Department, most of the items can also be helpful for departmental preparers and approvers of payment documents.

Remember that this document is not an exhaustive, all-inclusive checklist and discussion of voucher audit issues. When you encounter an unusual or questionable situation, and the other resources listed above don’t provide adequate guidance, ask questions and get help.

Review and Data Entry

Keep in mind that review/approval and data entry are two separate processes. Although the voucher auditor usually also performs the data entry function, this is not a requirement. The payment document should be ready for data entry when the voucher auditor signs the voucher.

Some types of vouchers might also require a second review/approval before they are entered into FAMIS.

Terminology

Order, purchase order, and PO generally are used interchangeably throughout this document. These terms refer to purchasing module orders (P-, L-, and E-documents) and to manual purchase orders. In some cases, context might limit the terms.

Voucher and payment document are used interchangeably.
\textbf{INVOICE}

\textbf{Invoice}

- Definition – demand for payment
  An invoice (as defined by the State of Texas) is a document presented by a vendor for payment which includes information necessary for payment processing. [TAC, Sec. 114.1 and 114.5] The document need not be called an invoice by the vendor, and may be a monthly statement that details the charges. Additional support, such as charge slips or delivery tickets, may need to be attached to the invoice. \textit{Only one invoice may be included with each Invoice Transmittal form.}

- Original invoice
  The original invoice usually must be included with the payment document. If a copy is provided, it should be accompanied by an explanation/justification from the originator or approver.
  In some cases an original invoice cannot be distinguished from a copy, for example, a laser-printed invoice on plain paper or an invoice printed from an email attachment.

- Invoice vs. statement
  An invoice (customary business description) is a document from a vendor describing the goods or services and related charges provided to a customer. A statement (customary business description) provides a beginning balance, a listing of transactions (charges, credits, adjustments, and payments received), and an ending balance due to a vendor for a period of time, usually a month.
  Under the State definition, a statement may also be an invoice. The key question: is this document the demand for payment?

\textit{Invoice Number and Customer AR Number appear on the TFS check stub. The accuracy and completeness of these two fields is critical to the proper posting of the payment by the vendor’s accounts receivable department.}

- Invoice number – standards for unnumbered invoices
  FAMIS requires an invoice reference for each voucher and checks the invoice number to detect duplicate payments.

  Some invoices presented for payment do not have a vendor-assigned reference number. For these invoices, accounts payable must assign a number to use in FAMIS. Be sure to follow the invoice number standards for these payments.

- Customer AR number
  If the invoice includes a vendor-assigned customer number, it should be entered so that the vendor will be more easily able to properly post our payment against the correct invoice. For a conference registration fee, enter the employee name. Otherwise the Customer AR number should be blank.
• Balance forward / past due amount

We cannot simply pay a “balance forward” amount on a statement: we must have documentation to support each amount paid. Remember that a balance forward amount on a statement was a detail item on a previous statement. Check FAMIS screen 162 to determine if the balance forward has been paid, but received by the vendor after the statement date.

[See additional discussion in Goods / Services, Other Charges.]

- If the payment has been made, note the voucher number(s) in the voucher documentation.
- If the payment has not been made, contact the voucher preparer to determine when the payment document will be sent to accounts payable. Document the contact in the voucher, and provide the information to the accounts payable coordinator for follow-up.

Occasionally a vendor will receive, but misapply a customer payment. If the check date and reconciled date (screen 168) indicate that the payment should have been reported on the vendor’s statement, bring the situation to the accounts payable coordinator for research and follow-up with the preparer and vendor.

• Overpayment

An overpayment might identify a TFS payment which has been misapplied by the vendor, leaving another vendor account with a past due balance. This can happen easily when multiple TFS departments or offices have accounts with the vendor. The accounts payable coordinator must work with the preparer and vendor to correct the posting of payments in the vendor’s accounting records.

Some vendors treat a late payment penalty amount as an overpayment, rather than recognizing it as revenue. Research and note the voucher number which included the late payment penalty. Reduce one or more expense line items by the penalty amount to absorb the “overpayment.”

• Credits

Special attention is required if an invoice or statement includes a credit. A credit transaction is usually the result of reversing or reducing a previous charge on the account. If the credit and related charge appears on the same statement, they can be offset within the same FAMIS 15-digit account. However the related charge often appears in a prior statement, and research is needed to determine how to treat the current credit.

- If the related charge is a legitimate expense to a State account, get assistance. Special coding in FAMIS and a USAS Expenditure Transfer Voucher might be required.
- If the related charge is a legitimate expense to a local account, code the credit to the same local account. If the credit will cause a net negative local fund expenditure, get assistance.
Payroll Document Audit
NARRATIVE INSTRUCTIONS

- If the related charge (on a credit card statement) is improper and coded to an employee receivable account, code the credit to the same receivable account. Obtain approval from the Credit Card Coordinator. Proc Code V can be used to enter a line item as a credit on E or L documents. Contact the accounts payable coordinator for assistance.

Vendor (screen 203)
- State agency – VID, TIN, ITV, RTI
  If the vendor is a Texas state agency, special rules apply to the vendor ID number which we must use. The FAMIS vendor ID begins with 3, 6, or 9, followed by the 3-digit agency number repeated three times. The agency’s Federal taxpayer ID number (TIN) is not included in either the FAMIS or TINS vendor ID number. FAMIS screen 203 should show both the TIN and the vendor ID number.
  If TFS is paying from State funds (accounts 11xxxx or 12xxxx) and the agency’s invoice identifies a Recurring Transaction Index (RTI), the FAMIS voucher should use USAS doc type “T” and an Interagency Transaction Voucher (ITV) must be entered directly into USAS. Coordinate the entry of the voucher into FAMIS with the accounts payable coordinator so that the USAS entry can be made by the next business day.

- Petty cash custodian vs. employee
  When an employee serves as a petty cash custodian, a separate vendor ID is established for the employee to ensure that petty cash transactions are distinguished from transactions impacting the employee personally. Petty cash custodian vendor IDs can be readily identified: “TFS” appears before the individual’s name, and “Petty Cash” appears on the first address line. Use of the wrong vendor ID might result in incorrect tax reporting for the employee. Remember to use a UIN-based vendor ID for payments to employees.

- Current W-9
  To ensure compliance with Federal law related to disclosure of taxpayer ID number and backup withholding, TFS should have a current Form W-9 from a vendor before a payment is issued. FAMIS screen 203 shows the date of the most recent Form W-9 from each vendor. If the W-9 date is blank and the last modified date is older than 2000, or if the W-9 date is over five years old, corrective action is required before the voucher may be approved. Confirm from the W-9 files that the information in FAMIS is correct, and request a current Form W-9 from the vendor if necessary.

- Ownership type in name
  Confirm that key words, phrases, or abbreviations in the vendor name match the ownership information in FAMIS. A discrepancy between the invoice and FAMIS might indicate a change in ownership or business form.
  - Inc. – incorporated
  - LLC – limited liability company
PAYMENT DOCUMENT AUDIT
NARRATIVE INSTRUCTIONS

Invoice

- Remittance address
The remittance address on the vendor’s invoice should match FAMIS. Select the correct vendor ID or contact the accounts payable coordinator to set up a new vendor mail code. Alternate remittance instructions must come from the vendor, not from TFS departmental personnel. *A separate Form W-9 is not needed for each remittance address.*

- Federal taxpayer identification number
Look for the vendor’s Federal tax ID on the invoice or other vendor paperwork. If found, confirm that it matches FAMIS and mark it.
PROCUREMENT PROCESS

Authority
- Delegated purchasing limit; splitting purchases
  Departmental purchasing approval is generally limited to $5,000.
  - The limit is monthly for goods.
  - The limit is annual for services. Rental is a service.
  Repetitive purchases (for example, monthly charges) should be processed as multiple receiving and invoicing on a single purchase order. Check screen 162 to help identify split purchases which should be treated as a single order.
  When a manual voucher is used for a payment in excess of $5,000, you must ensure that proper approval has been obtained. In most cases, these vouchers relate to master contracts for agency-wide services for which a PO is not entered in FAMIS.
    - Procurement Card
    - Travel Card
    - Fuel Card
    - Vehicle liability insurance
    - Telephone service from TAMU Centrex and AT&T Wireless
- Exempt items
  Purchase orders coded entirely to object codes on FAMIS screen 306 are not subject to the delegated purchasing limit. These expenses must be carefully checked to the object codes to ensure that special rules for exempt items are not misused.
  Registration fees for multiple employees attending a conference can be paid on an exempt purchase voucher if the total registration fees exceed $5,000. Note that only ten department codes are allowed on FAMIS screen 235.
- Purchasing Department
  Non-exempt orders in excess of the delegated purchasing limit must be issued by the Purchasing Department. The limits are automatically imposed for FAMIS purchasing module documents, but manual vouchers must be checked for compliance.
- Emergency Response procedures
  Special purchasing procedures apply to emergency response purchases. The additional flexibility of these procedures is intended to allow TFS to meet immediate purchasing needs. Whenever possible, normal purchasing procedures should be followed, even when the expense is coded to an emergency response account.
  Voucher documentation should include an emergency response purchase justification statement. An Informal Bid for Emergency Purchases form will usually be included.
- Order placed before PO issued
  If the vendor documentation indicates that the order was placed before the PO date, ensure that the PO was issued as a confirming order.
PAYMENT DOCUMENT AUDIT  
NARRATIVE INSTRUCTIONS
Procurement Process

- Contracts – approvals
  TFS Administrative Procedure 01.02 specifies the approval requirements for contracts. Ensure that a copy of the approved contract is on file:
  - Attached to the PO
  - Included on the list of current leases
  - Included in the contract files maintained by the Contracts Officer
  If a contract has not been properly approved (signed by the Director, the Associate Director for Finance and Administration, or the Purchasing Department Head), the accounts payable coordinator should refer the payment document and contract to the Contracts Officer for review and processing instructions.

- Memberships – approval form
  Vouchers for professional and non-professional memberships must include an Institutional Membership Authorization form. If paid from appropriated funds, a vendor certification related to payment of lobbyist salaries is also required.
  [Administrative Procedure 40.06]

Special Procurement Issues
- State agency service department
  Purchases from a State agency service department (for example, printing center or motor pool) are exempt from many purchasing rules.

- Printing
  Printing is defined by as the process of applying an inked surface to paper. If printing is not performed by a State agency service department and the cost is more than $5,000 competitive bidding is required.

- Professional services
  Professional services are limited to the specific areas identified in the Texas Government Code 2254, Subchapter A. If a voucher for professional services is not supported by a P-document, seek assistance from the accounts payable coordinator. Professional service is a service within the scope of the practice of
  - accounting
  - architecture
  - landscape architecture
  - optometry
  - medicine
  - real estate appraising
  - land surveying
  - professional engineering
  - professional nursing

- Consulting

10
Consulting services consist of “studying” and “advising,” rather than “performing” routine work. Consulting services are governed by System Regulation 25.07.03. If a voucher for consulting services is not supported by a P-document, seek assistance from the accounts payable coordinator.

- **Contract Workforce**
  Contract workforce and contract workers include independent contractors, temporary workers supplied by staffing companies, contract company workers, and consultants. Administrative Procedure 40.11 – Contracting Procedure explains the special contracting and reporting requirements applicable to purchases of services charged to certain object codes. Contract workforce object codes are included in the Appendices of this document. The following documents might be required in the voucher package for each payment.
    - Notification from the Payroll Office about prior employment within TAMUS of an individual contractor
    - Contractor’s written statement about prior employment by any agency of the State of Texas
    - Employee/Independent Contractor Classification Checklist
    - TFS Contract Workforce Cost/Benefit Analysis
  The Contracts Officer can determine if supporting documentation is sufficient.
GOODS / SERVICES

Advance Payment
- Generally prohibited
  State agencies are prohibited from making advance payments except in special circumstances. If the voucher documentation requests payment for goods or services not received, the advance payment should be explicitly noted and justified.

- Leases, subscriptions, insurance premiums
  The delivery date should be the beginning of the lease, subscription, or policy period, and a requested payment date must be entered. Beginning and ending dates should be included in the description. NOTE: For a new subscription, the beginning date is often unknown, so the description will identify the length of the subscription. For a subscription renewal, the dates should be provided.

- Progress payments must be in PO
  Progress payments generally apply to services rendered over an extended period of time and are made for partial completion of an order for services, fabrication, or construction. These payments might be based on percentage of completion, receipt of materials used for fabrication or construction, or reaching specific benchmarks in completion of the ordered goods or services. The purchase order must explicitly state the permission and calculation basis for progress payments; otherwise progress payments are prohibited. The voucher documentation should cite the authorizing section of the contract or PO.

Description
- Clear identification; notes added to clarify
  The description on the invoice or other supporting documentation should tell clearly what goods or services are being paid on the voucher. Technical or scientific terms are appropriate, but additional explanation might be needed to clarify the description or relate the purchase to the program or account.

- Part/catalog number not adequate
  Although part or catalog numbers are frequently included, even required, in the order, invoice, and packing slip, a description in words of the goods or services is also required.

- Match to PO
  Confirm that the items on the invoice correspond to the ordered items.

Quantity and UOM
- Appropriate to items
  The unit of measure (UOM) should correspond with the way the goods or service are typically priced, measured, and sold. Proper selection of the UOM by the order
originator results in a smooth flow from the PO to the packing slip to the receiving report to the invoice.
The UOM “lot” is available for use when no other UOM is appropriate. In addition, “lot” might be used for a variety of low quantity/low price consumable items when creating separate line items provides no discernible benefit for tracking or future research.

- Match to PO
Match the quantity among the PO, receiving documentation, and invoice. If the UOM on the PO is different from the invoice, the voucher documentation should include quantity conversion between the UOMs.

- Back-ordered, missing, or damaged items
If items are back-ordered, missing, or damaged, determine if they are included on the invoice. When a revised invoice cannot readily be obtained from the vendor, reduce the payment amount.

**Price and Extension**

- Prices match PO or catalog
Check the invoice prices against the order, vendor order form, or catalog to ensure that the vendor honored (or discounted) the prices on which the order was based.

- Extended and totaled amounts correct
Check the arithmetic accuracy of the invoice. An error of $10.00 or more must be corrected by the vendor with a revised invoice.

- “Not to Exceed” terms on PO
Some orders are issued with price limits on specific items or on the entire order. Confirm that the invoice does not exceed the order limits.

- Discount offers
The face of the payment document should indicate a vendor’s offer of an early payment discount, and the voucher should be processed to take the discount if
possible. If the discount period is past, the dates in the documentation should allow us to identify the delay(s) which caused TFS to miss the discount.

Other Charges
- Texas sales tax and other taxes
  As a state agency, TFS is exempt from Texas sales tax, most other Texas taxes, and some Federal taxes. If taxes are included on the invoice, check the applicability of the taxes, and exclude the exempt tax amounts from the payment.
  Telecommunication taxes and other charges present continually changing applicability rules. Check the following web page for current tax exemption status.
  http://www2.dir.state.tx.us/sitecollectiondocuments/cts/telecom%20fees%20taxes%20and%20surcharges%20v%201%20sept21%202010.pdf
  If the invoice is from a recurring vendor, the payment document preparer needs to work with the vendor so that the taxes are not billed in the future, and credits are applied for taxes billed but not paid.
  [See additional discussion in Invoice, Balance forward / past due amount.]

- Shipping charges match PO
  Check the terms of the order to determine who is responsible for paying shipping charges and whether there are limits on the amount.
  See Administrative Procedure 40.05, section 5.5 for a description of shipping terms.

- Additional charges included on PO
  Ensure that any additional charges on the invoice are approved in the terms of the order.
ACCOUNT NUMBER

Each FAMIS account number is composed of three separate elements: either SL-SA-object code or GL-00000-account control. The voucher review process applies to the entire 15-digit account number. (The term “subcode” refers to either object code or account control.)

- SL (6-digits) – specific program, fund source, responsible individual
- SA (5 digits) – breakdown within SL, often by location, also other accounting needs; always zeros for GL
- Object Code (4 digits) – specific type of revenue or expense
- GL (6 digits) – identifies balance sheet for non-revenue, non-expense transactions
- Account Control (4 digits) – specific balance sheet or special line item

[See the Chart of Accounts Guide in the Appendices.]

Appropriateness

- Items “fit” within program (SL)
  Ensure that the expense makes sense for the SL account(s) being charged. Screen 008 contains comments for some accounts which might explain the scope of the account.
  Ensure that charges to a support account for a closed office apply to the closed office rather than the office to which personnel were moved.

- Items “fit” within funding source
  Ensure that the expense follows the rules for the account’s funding source. Funding source issues include the following:
  - Appropriated or non-appropriated
  - In State treasury or outside State treasury (local)
    If in State treasury, which fund and what limitations on usage?
  - Fund group
    - Forestry and General (accounts 1xxxxx)
    - Designated (accounts 2xxxxx)
    - Restricted (accounts 4xxxxx)
    - Plant (accounts 8xxxxx)
  - Sponsored project or TFS funding

- Transaction dates fall within program term dates
  Check screen 008 to ensure that the transaction falls within the term dates for sponsored project accounts.

- Object code matches items
  The object code identifies the “natural” category of expense. Check to ensure that the correct object code is used.
  Be especially careful of object codes with “other” in the title. These codes should be viewed as “last resort” rather than “first choice.” The following table shows many of
the “other” codes along with related object codes which should be reviewed as a possible better choice for coding the expense.

</table>

- Related object code groups
  FAMIS object codes provide detailed breakdown for some types of expense. Close review is necessary to ensure that the correct object code is selected.
  - Grants – grantee type
    Ensure that the grant recipient type matches the grant object code. Note that object code 6018 – Grants-Individuals – applies to partnerships and for-profit corporations as well as individuals.
  - Supplies, materials, repairs
    Make certain that the type of expense and the account correspond to the object code used. For example, paint might be coded to nursery supplies for West Texas Nursery, to building supplies for a renovation project, or to educational supplies for the Wildfire Academy.

- Disallowed expenditure types
  Certain expenditures are prohibited from Federal funds under the cost principles in OMB Circular A-21. These expenditures can be charged to other accounts, but may not be used to meet matching requirements of sponsored agreements. The disallowed expenditure object codes are marked with an asterisk on the SOBA Expense Object Code web page and appear in the Appendices of this document.
OTHER REVIEW ISSUES

- AY and State bank
  When an expense is paid from funds in State treasury, the FAMIS bank must correspond with the appropriation year (AY – identified by second digit of bank number) for the expense. If the order date falls into the prior fiscal year, override the bank to match that year.

- Legal Descriptive Text
  The Legal Descriptive Text (LDT) for a voucher sent to USAS includes the long description (F6 on screen 168) as well as pre-defined text from screen 841. The text is added by entering the appropriate LDT code on the invoice or voucher screen. Ensure that appropriate LDT codes are included on the voucher.

- Useful description; important info first (line 1 on voucher or invoice)
  o Line 1 on purchase order feeds to the invoice (screen 345)
  o Line 1 on the invoice feeds to the automated voucher
  o Line 1 for manual vouchers
  The description which appears on the voucher screens and voucher data form is pulled from the description for the first line. The invoice description for purchasing documents feeds from the description for the first line of the order.
  NOTE: USAS will not process a voucher with a description three or fewer characters, so the description must be expanded. For example, use “gasoline” instead of “gas”; “motor oil” instead of “oil”; “ice for fire line” instead of “ice”.
  On-line research is either enhanced or hampered by the information appearing at the beginning of the description.
  o Screen 162 shows 21 characters
  o Screen 163 shows 16 characters
  o Screen 167 shows 11 characters (F11 for 35 characters)
  o Screen 168 shows 25 characters (F6 for 11 lines of 40 characters)
  Modify the description from the purchase order if needed. For manual vouchers, select the voucher description from the body of the voucher and underline it with a contrasting colored pen or highlighter. WARNING: On some documents, a highlighter will cause the ink to smear or fade.
  Disputed amounts should be included in the description.
  For some types of payments, accounts payable has established standard description formats. Be sure to follow the description standards for these payments.
  o Avoid words which add no meaning, for example, reimbursement.
  o Use common abbreviations.
  o Avoid unnecessary punctuation, but keep the description readable.
  o Most dates don’t need the year, but include the year if needed.
  o For recurring payments, put the time period first, for example, Feb lease or Nov-Jan insect serv.
For goods or materials, put the product name first. For example, if ordering a red plaid, plastic, felt-backed, 36 inch x 72 inch, oblong tablecloth, the first word in the description field should be “tablecloth.”

- Dates – order, delivery, invoice, invoice received, discount, due, payment due, requested payment

Vouchers have lots of dates, and a wrong date can result in untimely payment or incorrect prompt pay interest calculation. Check each date for reasonableness and accurate entry.

  - **Order date** is the date on which the order was awarded to the vendor.
    - Signature date of a P-document.
    - Purchase date for a spot purchase.
    - Fax date for an order faxed to the vendor.
    - Telephone authorization date for an order placed by phone.
  
  - **Delivery date** is the date on which goods or services are received. Note that for some services, such as insurance, facilities rental, and subscriptions, the delivery date is the beginning, not end, of the service period.
  
  - **Invoice date** is the date of the vendor’s document which demands payment. For a statement of account, the invoice date often is the last date of the statement period.
  
  - **Invoice received date** documents when the TFS department or field office originally received the invoice. Note that when the purchase order specifies an invoice address, the invoice received date documents receipt at the specified address: the prompt payment “clock” doesn’t begin until the terms of the PO are met. If a corrected invoice is provided by a vendor, the invoice received date is for the corrected invoice, not the original invoice.
  
  - **Discount date** is the date by which FAMIS should produce a payment in order to take the discount. The discount date must be entered in the due date field.
  
  - **Due date** refers to the date by which FAMIS should produce a check or ACH
  
  - **Payment due date** refers to the date on which the payment is due based on the prompt payment rules. USAS uses this date to calculate prompt payment interest when applicable.
  
  - **Requested payment date** is the date by which USAS should produce a warrant or ACH. The requested payment date overrides the payment due date.

- Voucher / Invoice Transmittal signatures

Verify that appropriate departmental signatures appear on the payment document. Geographic separation among employee/traveler, preparer, and department head/alternate approver sometimes presents challenges in obtaining original signatures.
signatures on a single document. As long as all required signatures are present and accounts payable has the original payment document and support, TFS accepts a signature on a copy of the original document. For example, the original travel voucher has the traveler’s signature and a copy faxed to the department head in another city has the approver’s signature. To further expedite processing of time-sensitive payments, accounts payable will occasionally process a payment from a faxed voucher and support, but the original documents MUST be mailed to accounts payable and attached to the faxed documents in the paid voucher files.

- An invoice transmittal requires a signature from a preparer or approver.
- A purchase voucher requires the name of the preparer and a signature from an approver.
- A travel voucher requires signatures from the traveler and an approver.
- A credit card expense distribution voucher requires the name of the preparer and signatures from the credit card holder and an approver.

NOTE: No employee may approve a payment to himself.

NOTE: Any payment to a department head/program leader must be approved by a superior. A payment to the Director must be approved by the Executive Assistant to the Director.

Approvers for an account can be identified in FAMIS:

- Identify the department and subdepartment codes on screen 006 (SL) or screen 050 (SA).
- Identify the office and view on screen 860.
- Identify the signers on screen 923.

TFS has adopted the practice of accepting a single approval signature for manually-prepared vouchers that include charges to multiple accounts. The signer must have approval authority for at least one of the accounts on the voucher. The approver accepts responsibility for contacting other affected approvers if there are any questions or concerns about the allocation of charges on the voucher.

- Business meals documented with 5 W’s
  Business meals (object code 6340) must be supported by documentation answering who attended, what business was conducted, where the meal was purchased, when the meal was purchased, and why the meal served a purpose related to the TFS mission.

- Interest control flag and reason
  Screen 817 identifies the object codes normally subject to prompt pay interest. The interest control flag allows a transaction to force or refuse interest rather than following screen 817. A reason code is required when the interest control flag is set.

  - AD – agency discretion exercised
  - AI – automation issue
  - AP – advance payment
  - CD – contract date exception
  - DP – disputed payment
  - DT – direct payment of travel expenses
PAYMENT DOCUMENT AUDIT
NARRATIVE INSTRUCTIONS
Other Review Issues

- ER – employee reimbursement
- FC – Federal contract terms prohibit payment
- GE – GSC exemption granted and documented
- MI – mailing instructions on PO not followed
- NI – no invoice received
- RD – return direct deposit reissue
- SA – State agency

- Appropriate form/version
  Ensure that the payment document form is current and not modified.
TRAVEL EXPENSES (Employee, Direct-Bill Vendor, and Credit Card)

Record of Transportation and Duties
- Includes purpose, not just destination and route
  In addition to destination(s) and route information, the purpose(s) of the travel must be included and must relate to the program and accounts to which the expenses are charged.

- Dates match
  Match the dates to the travel dates on the face of the voucher and to the dates in the meals and lodging section of the voucher. If out-of-state travel is involved, the Record of Transportation and Duties is used to determine the meals and lodging reimbursement limits.

- Personal vehicle mileage detail
  Personal mileage reimbursement will be determined using the electronic mapping service provided by Mapquest. The Travel Authorization Form must be included with travel voucher.

- Direct billed and credit card items listed; travelers names included
  The travel voucher must identify travel expenses incurred by the traveler, but charged to a TFS credit card or to a direct-bill vendor, for example, airfare or lodging. A voucher paying these travel expenses must include the travelers’ names and sufficient information from the Record of Transportation and Duties to relate the expense to the program and accounts being charged.

Meals and Lodging
- In-state vs. out-of-state
  The destination of a trip determines whether the trip is in-state or out-of-state. Thus, travel expenses incurred in Texas during the departure and return legs of a trip to another state are reported (and coded) as out-of-state, even if an entire day is spent in Texas. (Remember, it’s over 800 miles from El Paso to Beaumont, and over 750 miles from Brownsville to Amarillo.)

- Each day listed
  For overnight travel, each day of travel should be listed in the Meals and Lodging section, even if no meal or lodging expenses are claimed on the travel voucher.

- Appropriate limits
  State law, including the General Appropriations Act (GAA), does not provide for a fixed reimbursement amount for meals or lodging under any circumstances. Meals and lodging are reimbursed based on the traveler’s actual expenditures subject to specific maximum limits.
Texas limits are specified by the GAA. Limits for other states follow the Federal travel expense guidelines. When out-of-state travel includes more than one locality during a calendar day, the employee’s reimbursement limit is the highest limit for each of the localities. If an employee incurs lodging expense in excess of the reimbursement limit, only a pro rata portion of the occupancy tax may be reimbursed.

- **Travel Authorization form**
  Ensure that an approved Travel Authorization form is attached for non routine travel. See TFS Administrative Procedure 20.03 Travel.

- **Director’s approval for “actual expenses”**
  The General Appropriations Act provides that the CEO of each State agency may be reimbursed for meals and lodging up to twice the maximum rate for other employees. The Director may authorize this higher rate for other TFS employees in specific limited circumstances. The authorization must be approved in writing before the beginning of the travel and must be attached to the travel voucher.

- **Shared lodging**
  When employees share a hotel room, the expense must be split between the employees. Separate travel vouchers are required for each employee.

**Other Travel Issues**

- **State Travel Management Program rates**
  The Texas Building and Procurement Commission negotiates contract rates for lodging, airfare, and auto rental. These contracted rates are available to State employees under the State Travel Management Program (STMP). In some cases the contract lodging rate exceeds the maximum lodging reimbursement for the locality, but still provides a more economical lodging rate. Use of a contract rate DOES NOT increase the maximum lodging reimbursement rate.

- **Contract Travel Vendor Exception**
  Use of STMP contract lodging, airfare, and auto rental generally is required. When a traveler incurs off-contract expenses, the payment document must explain the exception.
    - The Contract Travel Vendor Exception Form is used with direct bill payments and credit card payments.
    - Block m. of the Travel Voucher is used with travel payments to employees.
  An exception reason is not needed if a room is obtained at a contract hotel for a lower rate than indicated in the contract.

- **Airfare not charged to personal credit card**
  Confirm that the credit card account to which airfare is charged is a TFS credit card.
• Original receipts show payment
To prevent employees from obtaining reimbursement from multiple sources, the original receipts must be included in the voucher. The receipts should indicate that payment was received from the employee.
In cases where no receipt is issued, for example, subway fares, laundromat costs, or coin telephone calls, the voucher should include a statement that the traveler made the payment, but was unable to obtain a receipt.
Refer to the “Invoice” section of this document.

• Voucher description: first date, last date, destination
The travel voucher description (for the first line) should begin with the standard layout to facilitate on-line research: “mm/dd mm/dd destination.” Additional destination or purpose information may follow. The year is generally not included with the dates.

• Travel advance noted and applied against expenses
If the traveler received a travel advance, the amount should appear on the face of the voucher and will reduce the reimbursement due to the employee.
Note that special data entry processes are required for travel vouchers with travel advances. Attach a copy of the travel advance form.
CREDIT CARD EXPENSE DISTRIBUTION VOUCHERS

Other Credit Card Issues
- Account number, statement date, cardholder name, equipment ID
  Confirm that the voucher information matches the credit card statement date, account number, and employee name or equipment identification.

- Vendor ID matches credit card type
  Check the vendor ID on the voucher to ensure that the correct mail code (final digit) is selected for the procurement, travel or fuel card program.

- Missing Receipt forms
  Ensure that a Missing Receipt form is completed for each unsupported transaction on the credit card statement. The form must be signed by both the cardholder and the supervisor.

- Transaction Log
  The cardholder must prepare and sign the procurement card or travel card transaction log. Each transaction on the credit card statement must appear on the log.

- Voucher total matches statement
  Ensure that the voucher total and the credit card statement final balance agree

- Voucher description
  Use the cardholder’s name as the description for the procurement card or travel card voucher.
PAYMENT DOCUMENT AUDIT
NARRATIVE INSTRUCTIONS
Payment Document Error Notification

PAYMENT DOCUMENT ERROR NOTIFICATION

- Email Preparer
To resolve any issues on payment documents submitted to accounts payable, an email notification should be sent to the preparer. Properly identify the issue and request the missing information.

- Attach Documentation to Payment Document
Place copies of the email with the payment document. This helps document the error and adds a timestamp of when the error was detected and questioned. Missing documentation and/or information should be submitted to accounts payable within five business days. If missing information is not submitted on a timely basis see the accounts payable coordinator for further review.
ACCOUNTS PAYABLE APPROVAL

- Special handling flag
  A voucher might require special handling in accounts payable for several reasons, for example, alternate check distribution, prepaid (manually prepared) check entry, manual notations added to the check, or special enclosure. If the voucher needs special handling, place an adhesive flag on the voucher so that it extends off the right side. This will alert each person processing the voucher to ensure that the special instructions are followed. The flag should be removed when the special handling has been addressed and prior to filing the completed voucher.

- Additional coding for data entry
  Some coding is added to the voucher by the accounts payable reviewer, for example, LDT codes, revolving, interest control, PDT, PCC, override bank. Ensure that appropriate entries are written on the payment document.

- Signature and date (first reviewer)
  The voucher auditor must sign and date the voucher indicating that the voucher has been reviewed and found to satisfy the documentation requirements for payment.

- Second review if needed
  Some types of vouchers might require a second review before data entry is performed. The second voucher auditor must also sign and date the voucher.
