HIGHLIGHTS

Texas Forest Resource Harvest Trends 2005

2005 TIMBER REMOVAL

- Total growing stock timber removal was 694.4 million cubic feet in 2005, a increase of 7.7 percent from last year.
 - Pine removal was up 9.2 percent to 555.3 million cubic feet.
 - Hardwood removal was up 2.2 percent to 139.1 million cubic feet.
- Harvest of timber for industrial use in the production of wood products was 701.4 million cubic feet.
 - 564.3 million cubic feet of pine was harvested for industrial consumption.
 - 137.2 million cubic feet of hardwood was harvested for industrial consumption.
- The stumpage value was up 12.8 percent to \$494.6 million, while delivered value was up 7.4 percent to \$839.6 million.
- Harvest of sawlogs increased 8.6 percent from 2004 to 1,716.9 million board feet.
- Harvest of wood for veneer and structural panel production increased 7.0 percent to 195.3 million cubic feet from a year ago.
- Pulpwood harvest increased 7.4 percent to 2.78 million cords.
- Texas exported more timber than it imported in 2005. The total import from other states was 63 million cubic feet while the total export was 87.9 million cubic feet. The net export was 3.5 percent of the total roundwood production in Texas.

PRIMARY FOREST PRODUCTS

- Production of primary wood products in 2005 included:
 - 1.96 billion board feet of lumber, an increase of 2.5 percent from last year.
 - 3.25 billion square feet of structural panel products, an increase of 13.7 percent from 2004.
 - 2.51 million tons of paper and paperboard, down 1.9 percent from 2004.

MILL AND LOGGING RESIDUES

- Total production of mill residue in 2005 was 6.63 million tons.
- Total production of logging residue in 2005 was 117.2 million cubic feet.

Harvest Trends 2005

INTRODUCTION

Forests are vital economic and environmental assets in East Texas. The wood-based industry employed over 95,000 people in 2000 and was one of the top 10 manufacturing sectors in the state. In 23 of 43 East Texas counties, the forest sector was one of the top two largest manufacturing employers. The value of timber ranked fifth in 2004 among Texas' top agricultural commodities, behind beef, cotton, greenhouse and nursery, and broilers¹.

To gather the most current information on the status of this valuable resource, the Texas Forest Service (TFS) conducts an annual survey of the state's primary forest products industry. This 41st annual report provides information on the volume and value of timber harvested in East Texas during 2005, and reports the production of primary wood products logging residue, and mill residue. Data on forest management activities is also presented.

Information for this report was provided by 117 mills in Texas and 27 mills in surrounding states. The Texas Forest Service appreciates the cooperation of these companies, without which this report would not be possible.

2005 ECONOMIC CONDITIONS

The US economy experienced strong growth in 2005 despite of the damages from Hurricanes Katrina and Rita. The real Gross Domestic Product (GDP) growth was 3.2 percent on a year-over-year basic comparing GDP in 2005 as a whole and GDP in 2004 as a whole². Quarterly GDP growth rates (seasonally adjusted) was robust through out most of the year: 3.4 percent for first quarter, 3.3 percent for second quarter, 4.2 percent for third quarter, and 1.8 percent for fourth quarter. The U.S. international trade deficit reached new high in 2005. The Federal Reserve raised the short term discount rate 25 base points eight times during 2005, changing the rate from 2 1/4 percent in the beginning of the year to 4 1/4 percent by the end of the year³. Inflation in 2005 was moderate. Mortgage rates climbed steadily but still lag behind the fast rising short term interest rate.

The housing market in the U.S. had another year of strong growth. The total number of residential housing units authorized by building permits increased 3.6 percent to 2.148 million units in 2005 from 2.073 million units in

2004. Single-family building permits increased 3.7 percent, from 1.617 million units in 2004 to 1.676 million units in 2005. Multi-family starts grew at an annual rate of 3.3 percent in 2005. The total number of multi-family starts increased from 456.7 million units in 2004 to 471.8 thousand units in 2005^4 .

Growth in the Texas economy was stronger than the national average in 2005. Real Gross State Product (GSP) was up 4.3 percent to \$845.5 billion (based on 2000 constant dollar) in 2005 from the previous year⁵. The annual growth rate for residential housing building permits in Texas jumped up 10.2 percent in 2005. Total number of building permits in Texas was up from 191.2 thousand units in 2004 to 210.6 thousand units in 2005. Multi-family housing increased 11.6 percent and single-family housing rose 9.8 percent⁴.

The strong housing market and fast growing economy created high demand for solid wood products. Total softwood lumber production in the U.S. in 2005 was 40.7 billion board feet, an increase of 6.4 percent from 38.3 billion board feet in 2004. Of the total softwood lumber production, 47.7 percent was from the U.S. West, 46.4 percent was from the U.S. South, and 5.9 percent was from the rest of the country. The annual softwood lumber production in the three U.S. regions increased 4.1 percent (West), 8.9 percent (South), and 6.4 percent (Other), respectively⁶. The softwood lumber prices in 2005 fell back a little from its high in 2004. The annual average Random Lengths Framing Lumber Composite price decreased 4.2 percent, from \$404 per thousand board feet (mbf) in 2004 to \$387 per mbf in 2005⁶.

The 2005 production of structural panel in the US, including plywood and oriented strand board (OSB), increased 1.3 percent from a year ago. The U.S. produced 29.32 billion square feet (3/8-inch basis) of structural panels in 2005, compared to 28.94 billion square feet in 2004. Production of plywood and OSB changed in opposite directions. Plywood production was down 2.3 percent to 14.33 billion square feet, while OSB production was up 5.0 percent to 14.99 billion board feet. OSB continued to gain market share over plywood because of its lower wood cost and higher manufacturing efficiency. The share of OSB in total panel production in the U.S. increased to 51.1 percent in 2005, up from 49.3 percent in 2004⁶.

Added production capacities eased structural panel prices in 2005 despite strong demand. The average annual

Million Board Feet

Year

Hardwood

Figure 1. Total Timber Removals, 1994-2005

Pine

Random Lengths Structural Panel Composite price was \$408 per thousand square feet (msf) in 2005, which was 11.7 percent lower than 2004, the highest level in recent years⁶.

The total production for the paper and paperboard sector in the U.S. declined slightly in 2005 compared to the previous year. The total production of paper and paperboard went down 0.9 percent from 91.9 million short tons in 2004 to 91.1 million short tons in 2005. Paper production totaled 41.3 million tons in 2005, a decrease of 1.2 percent from 2004. Paperboard production was down 0.4 percent to 49.9 million tons. Market pulp shipment to North America in 2005 was 8.3 million short tons, compared with 8.1 million short tons in 2004⁷.

STUMPAGE PRICES

According to the *Texas Timber Price Trends* bimonthly timber market report, the average annual pine sawtimber price rose in 2005 to \$305.58 per mbf, Doyle scale, up 6.7 percent from the 2004 average annual price of \$286.42 per mbf. The average annual mixed hardwood sawtimber prices decreased 13.5 percent from its 2004 level to \$164.16 per mbf in 2005. Pine pulpwood price dropped to \$17.44 per cord from its 2004 price, down 10.7

Million Dollars

Figure 2. Value of the Timber Harvest, 1994-2005

percent. Mixed hardwood pulpwood prices were up 16.5 percent to \$19.69 per cord in 2005. Table 6 provides historic data on stumpage prices.

TIMBER REMOVALS

Growing Stock Removals

Total removals of growing stock in East Texas in 2005, including both pine and hardwood, increased 7.7 percent from the previous year (Figure 1). The total volume of growing stock removed from the 43-county region was 694.4 million cubic feet in 2005, compared to 644.8 million cubic feet in 2004. Included in the total growing stock removals are timber harvested for industrial use and an estimate of logging residue. Growing stock removals in 2005 and the past years were adjusted using the new harvest residue ratios from the updated Texas Wood Utilization Study by the USDA Forest Service.

By species group, growing stock removals in 2005 were comprised of 555.3 million cubic feet of pine and 139.1 million cubic feet of hardwood. Pine removals were up 9.2 percent and hardwood removals were up 2.2 percent from 2004. Figure 3 and Table 14 illustrate the harvest volume by species group by year.

Industrial Roundwood Harvest

Industrial roundwood harvest in Texas, the portion of the total removals that was subsequently utilized in the manufacture of wood products, totaled 564.3 and 137.2 million cubic feet for pine and hardwood, respectively. The pine industrial roundwood harvest was up 9.0 percent, and the hardwood roundwood harvest was up 2.8 percent from 2004. The combined harvest rose 2.6 percent to 701.4 million cubic feet. Ninety five percent of the industrial roundwood were from growing stock and 5 percent of the industrial roundwood were from non-growing stock in 2005 (Table 13).

Table 1 lists the harvest of pine and hardwood by county for 2005. Top timber producing counties included Polk, Jasper, Cass, Hardin, and Angelina.

Figure 4 illustrates the intensity of timber harvest expressed in cubic feet of harvest per acre of timberland. Chambers, Jasper, Polk, Angelina, and Upshur Counties had the highest relative timber harvesting intensity during 2005.

Value of Timber Harvest

As Figure 2 illustrates, stumpage value of East Texas timber harvest increased 12.8 percent in 2005 to \$494.6 million. The delivered value was up 9.4 percent to \$781.8 million. Pine timber accounted for 89.2 percent of the total stumpage value. Figure 3 depicts the value of the harvest by product. Table 1 lists the value of the harvest by county. Table 7 lists stumpage and delivered value by product category.

Sawlogs

Harvest of sawlogs for lumber production increased 8.6 percent to 1.72 billion board feet, which accounted for 39.9 percent of the 2005 total timber harvest. The pine sawlog cut totaled 1.47 billion board feet, up 13 percent, while the hardwood sawlog harvest was down 11.6 percent to 250.7 million board feet. Jasper, Angelina, Tyler, Cass, and Nacogdoches counties were the top producers of sawlogs. Table 2 lists sawlog harvest by county.

Veneer and Panel Roundwood

Harvest of timber for the production of structural panels, including plywood and OSB and hardwood veneer, was 195.3 million cubic feet in 2005, a 7.0 percent increase from 2004. The timber harvest for structural panels was 27.9 percent of the total timber harvest in 2005. Almost all of the veneer and panel roundwood were pine. Polk, Panola, Jasper, Trinity, and Tyler counties were the top producers of veneer and panel roundwood. Table 3 lists the harvest of veneer and panel roundwood by county.

Pulpwood

Harvest of timber for pulp and paper products in Texas added 7.4 percent in 2005 over the last year to 2.78 million cords. The roundwood pulpwood harvest accounted for 32.3 percent of the total timber harvest in 2005. Pine pulpwood made up 57.5 percent of the total pulpwood production in 2005. Jasper, Hardin, Cass, Polk, and Newton Counties were the top producers of pulpwood. Table 4 lists the roundwood pulpwood harvest by county.

Other Roundwood

Other roundwood harvest included posts, poles and pilings that totaled 2.3 million cubic feet in 2005. Table 5 lists harvest of these products by county.

Import-Export Trends

Texas was a net exporter of timber products from surrounding states in 2005. Net exports of roundwood were 24.9 million cubic feet, or about 3.5 percent of the total industrial wood production in Texas. Exports of roundwood from Texas were 87.9 million cubic feet, while imports totaled 63.0 million cubic feet in 2005. Table 8 details the interstate movement of roundwood.

Texas mills utilized 87.5 percent of the timber harvested in the state in 2005. The remainder was processed mainly by mills in Arkansas, Louisiana, and Oklahoma. Details are listed in Table 8.

PRODUCTION OF FOREST PRODUCTS

Lumber

Texas sawmills produced 1.96 billion board feet of lumber in 2005, an increase of 2.5 percent over 2004. Production of pine lumber rose 8.9 percent to 1.73 billion board feet in 2005 and hardwood lumber production dropped 29.1 percent to 230.1 million board feet. Table 9 and Figure 5 present a 10-year trend in lumber production.

Structural Panel Products

Production of structural panels, including plywood and OSB, was up 13.7 percent to 3.25 billion square feet (3/8-inch basis) in 2005. Table 9 and Figure 6 show the recent trend in structural panel output.

** Includes panel roundwood (pulpwood sized material chipped for panel production)

*** Includes pasts, pole and pilings

**** Products with stumpage value less than 1% of total are not included

Figure 4. Intensity of Timber Harvest by County, 2005

Paper Products

Production of paperboard totaled 2.51 million tons in 2005, down 1.9 percent from 2004. There was no paper and market pulp production in Texas in 2005. Table 10 and Figure 7 summarize recent trends in paper product output.

Treated Wood Products

There was a 24.5 percent decrease in the volume of wood processed by Texas wood treaters in 2005 from the previous year. The total volume treated in 2005 was 41.0 million cubic feet. Among major treated products, lumber accounted for 47.4 percent of the total volume, crossties accounted for 9.6 percent, and utility poles and switch ties accounted for 9.6 percent and 8.1 percent, respectively. Table 11 contains treated volume by product for 2004 and 2005.

Primary Mill Residue

Total mill residue, including chips, sawdust, shavings, and bark in primary mills such as sawmills, panel mills and chip mills in 2005 was 6.63 million short tons, 4.0 percent higher than the 2004 level (Table 12). Eighty four percent of the mill residue was from pine species and 16 percent

Figure 6. Texas Structural Panel Production, 1994-2005

was from hardwood species in 2005. Chips accounted for 51.0 percent of mill residue, followed by bark (34.6 percent), sawdust (8.2 percent), and shavings (6.1 percent) (Figure 8).

Logging Residue

Types of logging residue include stumps, tops, limbs and unutilized cull trees. Total logging residue produced in 2005 was 117.2 million cubic feet. Logging residue comes from both growing stock and non-growing stock trees. In 2005, 22.7 percent of the logging residue was from growing stock trees, and 77.3 percent of the logging residue was from non-growing stock trees. Sixty nine percent of the residue was from pine and 31 percent was from hardwood in 2005 (Table 13, Figure 9).

REFORESTATION ACCOMPLISHMENTS

Accomplishments in reforestation by funding source and ownership are presented in Table 15. A total of 103,601 acres was planted during the winter 2004/spring 2005 planting season. This was a 8.9 percent decrease from the previous year. Industrial landowners planted 69,712 acres, down 6.5 percent from the previous year. Nonindustrial private forest (NIPF) landowners planted 33,296 acres,

Figure 7. Texas Paper Production, 1994-2005

down 9.8 percent. Public landowners planted 593 acres in 2005. The NIPF landowners received \$1,385,811 million in cost share assistance for reforestation through federal and industrial cost share programs. Federal programs provided \$1,267,815 million in cost share funds. The Texas Reforestation Foundation provided \$117,997 cost share funding.

Note:									

See documents from the Forest Inventory and Analysis (FIA) Program for definition of growing stock. The separation of industrial roundwood harvest by source was based wood utilization rates from Texas 2003 Wood Utilization Study. Sawtimber includes sawlog, chip-n-saw, veneer log, and pole; poletimber include pulpwood, panel roundwood, post, and piling.

Note:

Total industrial roundwood harvest incudes harvest from both growing stock and non-growing stock. The growing stock removal was calculated using wood utilization rates from Texas 2003 Wood utilization study.
