1. Stumpage price statistics include gatewood sales. Stumpage prices for gatewood sales are estimated by subtracting cut-and-haul costs, other expenses, and profits provided by reporter.
2. Price is calculated from a specific conversion factor reported for each sale if available; otherwise, the average conversion factors listed on page 4 are used. MBF = Thousand Board Feet. The DOYLE LOG SCALE is used for board foot measurements.
3. ** indicates insufficient sales to report price statistics (less than three sales).
4. Prices listed for previous periods may differ from previously published values because additional data were received.
5. Price changes are calculated based on price per ton.
6. Extreme outliers from reported data are detected and removed using statistical methods.

Texas Timber Price Trends is a bi-monthly publication reporting average prices paid for standing timber and gate-wood in Texas. ***This report is intended only as a guide to general price levels.***

Individuals interested in buying and selling timber can use this report to monitor market trends and get a general idea of what timber is worth. However, it should not be used to judge the fair market value of a specific timber sale, which may vary considerably due to many factors.

HOW ARE AVERAGE PRICES CALCULATED?

Data published in this report are from actual timber sales as reported by as many as 60 cooperators active in the East Texas timber market. Reporters include forest product companies, logging contractors, consulting foresters, family forest landowners, and financial institutions.

The prices are volume weighted average prices. The price per ton for each product category is as reported or using a specific conversion factor provided by the reporters. When a specific conversion factor for each sale is not available, an average conversion factor listed here is used instead.

VOLUME CONVERSION FACTORS

Sawtimber & Chip-N-Saw

Pine— 8 tons=1 MBF-Doyle

Pine Chip-N-Saw— 2.7 tons= 1 Cord

Hardwood— 9 tons= 1 MBF-Doyle

Pulpwood

Pine— 2.7 tons=1 Cord

Hardwood— 2.8 tons= 1 Cord

This publication is also available on the Texas A&M Forest Service website at:
