

Winter Wildfire Weather Warning

Use: IMMEDIATE: TFN

Time: 30 SECONDS

Agency: TEXAS A&M FOREST SERVICE

Live copy:

State officials warn that weather conditions are creating a high risk for wildfire across Texas this winter. Warmer, drier-than-average and windy conditions are combining with dry vegetative fuels and increasing the potential for significant, large fires. Keep an eye on the weather during the coming months and heed warnings from local officials.
